

SOLVARES GROUP

**INTELLIGENT OPTIMISATION
OF RESOURCES
ALONG THE ENTIRE
VALUE CHAIN**

**THE EUROPEAN MARKET LEADER
FOR RESOURCE OPTIMISATION**

OUR TECHNOLOGICAL CORE: A CLEAR COMPETITIVE ADVANTAGE

The world is complex and constantly changing. Best-of-breed technology from Solvares enables you to master this dynamic on a daily basis and to use it to your benefit. With the solutions of the Solvares Group, you plan and control the processes that take place outside your company: from transport logistics to field sales and technical field service.

The result: the optimised use of resources and increased added value along the entire supply chain, in the field force and in customer service.

FLS - FAST LEAN SMART

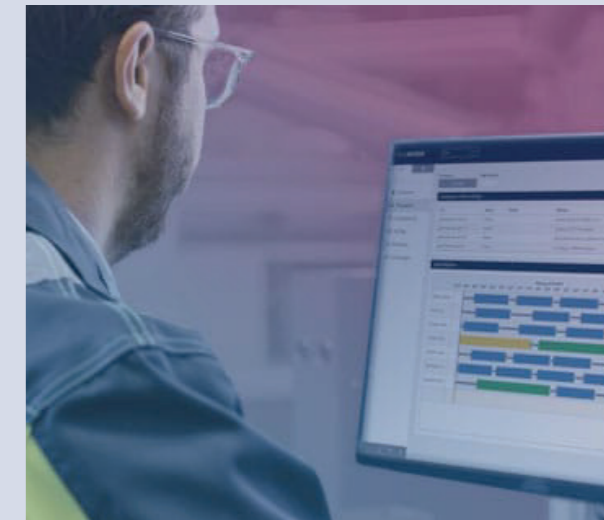

REAL-TIME TOUR PLANNING FOR FIELD SERVICE MANAGEMENT

With FLS' appointment and tour planning software, you optimise field service management for your 20+ field service resources. The unique FLS algorithm PowerOpt finds the optimal scheduling and route planning for service technicians, sales, deliveries, and inspections. Dynamic scheduling results in faster deployments and lower costs with higher customer and employee satisfaction.

FLS maps the requirements and workflows of every field service and delivery business in real time. The product portfolio covers the entire process from appointment and scheduling to execution, monitoring and analysis. For optimised appointments, routes and tours, lower costs, faster service and delivery.

CORE AREAS

SELF-SERVICE PORTALS	REAL-TIME PLANNING AND OPTIMISATION	MOBILE FIELD SERVICE SOLUTION
MOBILE REPORTING	ERP & CRM INTEGRATION	MANAGEMENT INSIGHTS
TECHNICAL SERVICE	INSPECTION	DELIVERY

"Our real-time software delivers unbeatable optimisation results. Field service organisations and their field forces become more efficient and productive."

Christoph R. Hartel · CCO FLS GmbH · CCO Solvares Group GmbH

MOBILEX

MOBILE APPS, DEPLOYMENT PLANNING AND CLOUD PLATFORM FOR FIELD SERVICE AND MAINTENANCE

mobileX solutions digitize and optimise business processes in technical service and maintenance. With mobileX-Dispatch, the proven solution for deployment planning and control, dispatchers maintain an overview of their resource planning at all times.

The mobile app mobileX-CrossMIP offers technicians and maintenance staff access to order data directly from the ERP system on their mobile device, and transmits feedback and reports directly to the back office. The mobileX-ServicePlatform is the public cloud platform for digital deployment planning and order processing of field service and maintenance orders.

CORE AREAS

DEPLOYMENT PLANNING	MOBILE APPS	CLOUD PLATFORM
DIGITAL FORMS	SAP INTEGRATION	INDIVIDUAL STANDARDS
TECHNICAL FIELD SERVICE	REPAIRS AND MAINTENANCE	SUPPLIERS

 **“Through our experience and expertise in the digitalization of field service and maintenance processes, we offer companies real added value and a great competitive advantage.”**
Hannes Heckner · Founder and CEO mobileX GmbH

PORTATOUR / IMPACTIT

FIELD SALES ROUTE PLANNING FULLY AUTOMATED AND MOBILE

portatour® is the personal tour planner for your field sales professionals. An intelligent algorithm automatically suggests who to visit and optimises these routes at the same time. Appointments, visit intervals and other factors are taken into account. The tour plan can be re-optimised at any time, within seconds.

As a result, you visit more customers and drive fewer miles. The web app is available for smartphone, tablet and desktop. portatour® is used in over 20 countries to increase efficiency and structure in the field sales force. Integrations with CRM or ERP systems are available to synchronise your existing data.

CORE AREAS

AUTOMATED ROUTE OPTIMISATION	CALL INTERVAL ADHERENCE	MOBILE REPORTING
CRM AND ERP INTEGRATION	RE-OPTIMISE ANY TIME	APPOINTMENT PLANNING
USER FRIENDLY	TERRITORY OPTIMISATION	AUTOMATIC REPORTING

 **“Field sales loves portatour®. Tour planning works at the push of a button, the rep is free for customer visits, and the management is happy about more performance.”**
Matthias Grünberger · CEO portatour®/impactit GmbH & CTO Solvares Group GmbH

OPHEO SOLUTIONS

AWARD WINNING SOFTWARE FOR THE AUTOMATION OF TRUCK DISPATCHING

With OPHEO, companies automate their entire truck dispatching. The software takes all the necessary calculations off the dispatcher's hands. Thanks to AI-based route optimisation and smart forecasting algorithms, transport logistics companies reduce both time and miles, and better utilize their transport resources.

In addition, OPHEO automates communication with customers, ensuring higher customer service quality. The award-winning mobile application OPHEO MOBILE integrates the driver into the processes. Therefore, OPHEO combines route planning and optimisation, telematics and Predictive Planning in a modern dispatch environment – the digital transport control center.

CORE AREAS

TOUR PLANNING	TOUR OPTIMISATION	PREDICTIVE PLANNING
ADVICE NOTE	ARRIVAL MONITOR	SHIPMENT TRACKING
TACHOGRAPH DATA	TELEMATICS	ELECTRONIC DELIVERY NOTE

 **"Our mission is to digitalise transport management in road freight transport. With the help of smart technologies, we are revolutionising the truck dispatcher's workplace."**
